

Campus Headhunter Recruitment for RoboMaster 2019 Robotics

Summer Camp (High School)

The RoboMaster 2019 Robotics Summer Camp is now open to registration! To discover and inspire more high school to explore the world of engineering, RoboMaster Committee is recruiting **campus headhunters** with **rich awards offered**.

That's right! This time, a **robotic theme** will be applied to the summer camp. What's more, the **awarding system is significantly changed** by calculating the **total number** of registered students from high school! As long as a student writes your name on the registration form as an introducer, you are rewarded with points no matter he/she is finally admitted or not.

Seize this wonderful opportunity and start headhunting now!

Condition A	Points
Recommended student to register for the summer camp	1/student
Recommended student passes resume review	3/student
Previous member of the summer camp successfully admitted	3/student
Recommended student successfully joins this summer camp as a new member	6/student

Note: New member refers to high school student who never successfully joined any RoboMaster Robotics Camps.

Condition B	Points
Recommended student wins the first place in the summer camp	7/student
Recommended student wins the second place in the summer camp	5/student
Recommended student wins the third place in the summer camp	3/student
Recommended previous member wins the first/second/third place	3/student

Note: Total score will be calculated by adding points earned from Condition A and Condition B.

Awards	Prizes	Requirements	
First Place	Mavic 2 Pro*1	Prerequisite condition: final points ≥ 60	These awards are for the top three headhunters who earns the most points among all peers with no less than two recommended students successfully admitted to the summer camp.
Second Place	DJI Osmo Pocket*1		
Third Place	Tello*1		
	DJI 5%-off coupon for consumer products + RoboMaster gift package (limited edition)	Prerequisite condition: final points ≥ 40	Winner of this award should recommend at least 1 student to join the summer camp successfully. The top three winners are excluded from this award.

A. How to do headhunting?

- As a campus headhunter, you can act on your own and scout for any high school students who are interested in robotics with critical thinking and independent research and developing abilities, especially those who had competition experience (about robot, information and algorithm). Recommend your target students to enter the official website www.robomaster.com, go to RoboMaster Robotics Camps and click RoboMaster Robotics Winter Camp (High School) to register for the RoboMaster 2019 Robotics Summer Camp.

- During registration, students are required to enter the **full name of their headhunters** in the **registration system** (the name of a headhunter should be real, and if more than one name is entered, the first one prevails). After students have successfully registered and admitted to the summer camp, the final points of headhunters will be calculated accordingly.

- Awards will be announced after a headhunter list is published on official forum (bbs.robomaster.com), and then RoboMaster staff will actively contact winners to deliver prizes.

Note: The RoboMaster Committee reserves the right of final interpretation to this activity.
